

Wolfman Enduro Dufflebag Instruction Sheet

Please read thoroughly before mounting the Enduro Duffle to the Enduro Saddlebags.

This kit includes:

- 1- Enduro Duffle
- 2- Mounting Straps

Note: The Enduro Duffle is intended to be used with the Enduro Saddlebags, as the Enduro Saddlebags create the mounting platform. If your bike is equipped with a rack you can mount the Enduro Duffle separately to the rack.

A properly mounted Enduro Duffle bag mounted to the Enduro Saddlebags. Fig. 1

Step-1. Fasten the 4 chromed snap hooks to the front and rear nylon D-Rings. Do this on both sides. Fig. 2

Step-3. Pinch to separate the buckles and thread them through the front and rear slots on the Enduro duffle, then fasten so the buckles sit on the top of the bag. The reflective strip should face the rear taillight. Fig. 3

Rear View

-Tighten the mounting straps so the bag is snug and secure. Make sure the mounting straps go through the webbing slots on the Duffle, so when empty or full the duffle cannot come off.

-Before riding do yourself a favor and make a dry run with the bags on. Make sure the straps are tight and secure.

Helpful Hint: Once you have mounted the duffle and want to remove it, use the chromed snap hooks and leave the webbing threaded through the slots. Now the bag is ready for your next trip.

-If these instructions make no sense, no worries, give us a call we are here to help. 800/535-8131 Enjoy- Wolfman
